

AI Acuity: The New Essential Life Skill

Arcitura
Webinar

A Webinar by AI Education Specialist Thomas Erl

What's more important than AI literacy?
An understanding of how AI is being integrated into
the world around us—from schools and workplaces
to our personal lives.

AI acuity is the sharpness of mind we develop, not
only how our tools are changing, but how our roles as
humans need to shift and evolve within increasingly AI
automated environments.

In the coming years, your ability to adapt to these
environments will be a defining factor of your success.
AI won't replace humans, but humans with AI acuity will
replace those without it.

In a future where everyone has access to the technology,
your competitive edge won't come from the tools
themselves, but from the human awareness and
judgment—the acuity—you bring to them.

Join Thomas for
a fast-paced session
packed with tips and
advice to help you
navigate the growing
AI landscape.

Webinar duration: 60+ minutes

Available in all time zones
