

CCP Master Symbol Legend

physical server

virtual server

VIM server

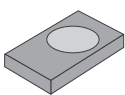

NAT server

CPU

memory

hard disk

network adapter

virtual network adapter

firmware

wireless access point

hypervisor

virtualization platform

virtual desktops

cloud storage data aging management mechanism

RAID-level identifier mechanism

router

core switch

top-of-rack switch

storage device (internal)

storage controller

hard disk with enclosure

connection ports or virtual switch

VI manager

multitenant application

resource cluster

resource pool

firewall

virtual firewall

physical network device

virtual network device

ready-made environment

management system

remote administration system

cloud storage data management mechanism

dataset

cloud consumer data

product, system or application

actively processing

component or program

malicious component or program

trusted attacker

attacker

service agent

malicious service agent

public key

conflict symbol

attribute token

private key

security element or locked resource

transition arrow

message queue

message

heartbeat message

repository or storage device

shared storage

physical storage device

RAID-level

state data in memory

service with state data (stateful service)

repository with state data

grid service

human

user interface/portal

workstation

mobile computer

mobile devices

business process/workflow logic

service

services

service layer

service contract (chorded circle notation)

decoupled service contract

service inventory

storage replication

live storage migration

LUNs

schema or data model

policy

certificate revocation list

fabric

LUN masking mechanism

cloud storage data placement auditor mechanism

LUN migration

service composition

general machine processable document

certificate

human readable document

virtualized application

example virtualized application

folder

pattern

pattern currently being covered

revisited pattern

symbols used in conceptual relationship diagrams

zone or region

organization

general physical boundary

system or program boundary

cloud

Internet

virtual private network
